Chair Conley received consent to here all proposals together from the Public Works Committee.

Nathan Sheets, Department of Public Works (DPW) Project Engineer, read the proposals and stated that all the district Councillors have approved these proposals. He stated that each of the proposals is a result of a new sub-division that has been built. This is a process that requires DPW to establish intersection controls for the complex.

Councillor Speedy asked what the criteria were for DPW to determine that these areas needed stop signs.

Mr. Sheets stated that there is a process were the Department of Metropolitan Development (DMD) goes before the Public Works Board to receive acceptance of the sub-division into the city's maintenance jurisdiction. Once the board approves the area, DPW reviews and verifies that these areas will benefit the community.
